

MOBILITY

OLDRATI,
INTERNATIONAL
LEADER IN THE
POLYMERS WORLD
SINCE 1964

Since 1964,
growing, improving, innovating.
Together.

OLDRATI GROUP

The Oldrati Group has been an industrial excellence for over 60 years in the design and production of technical rubber, plastic, and silicone components, standing out for its vision, approach, and performance.

With 1,400 employees and an aggregate turnover of over 180 million euros, the Group serves various industrial sectors, including Automotive, Oil & Gas, and Heating, as well as consumer sectors such as Sports, Healthcare, and Household.

The Group integrates all production phases in-house, from design and compounding to the final product, distinguishing itself with a unique manufacturing model.

From product co-design to multi-component assembly, Oldrati brings the guiding principle All in One to life, ensuring reliability and quality in every process and production phase.

With production sites in Turkey and Slovakia, in addition to Italy—where its Headquarters are also located—Oldrati strategically addresses an international market composed of major global industry players.

Technological innovation and sustainability drive the Group's continuous development, reflected in projects focused on digitalization, automation, material regeneration (Ogreen), and energy efficiency, along with concrete actions to reduce emissions.

Market focus, material research, and product development are the keys to the future, enabling Oldrati to anticipate market trends with innovative materials and solutions tailored to customer needs.

AGGREGATE TURNOVER

Over

180 M€

GROUP PRODUCTION SITES

Total Area

+220.000 sqm

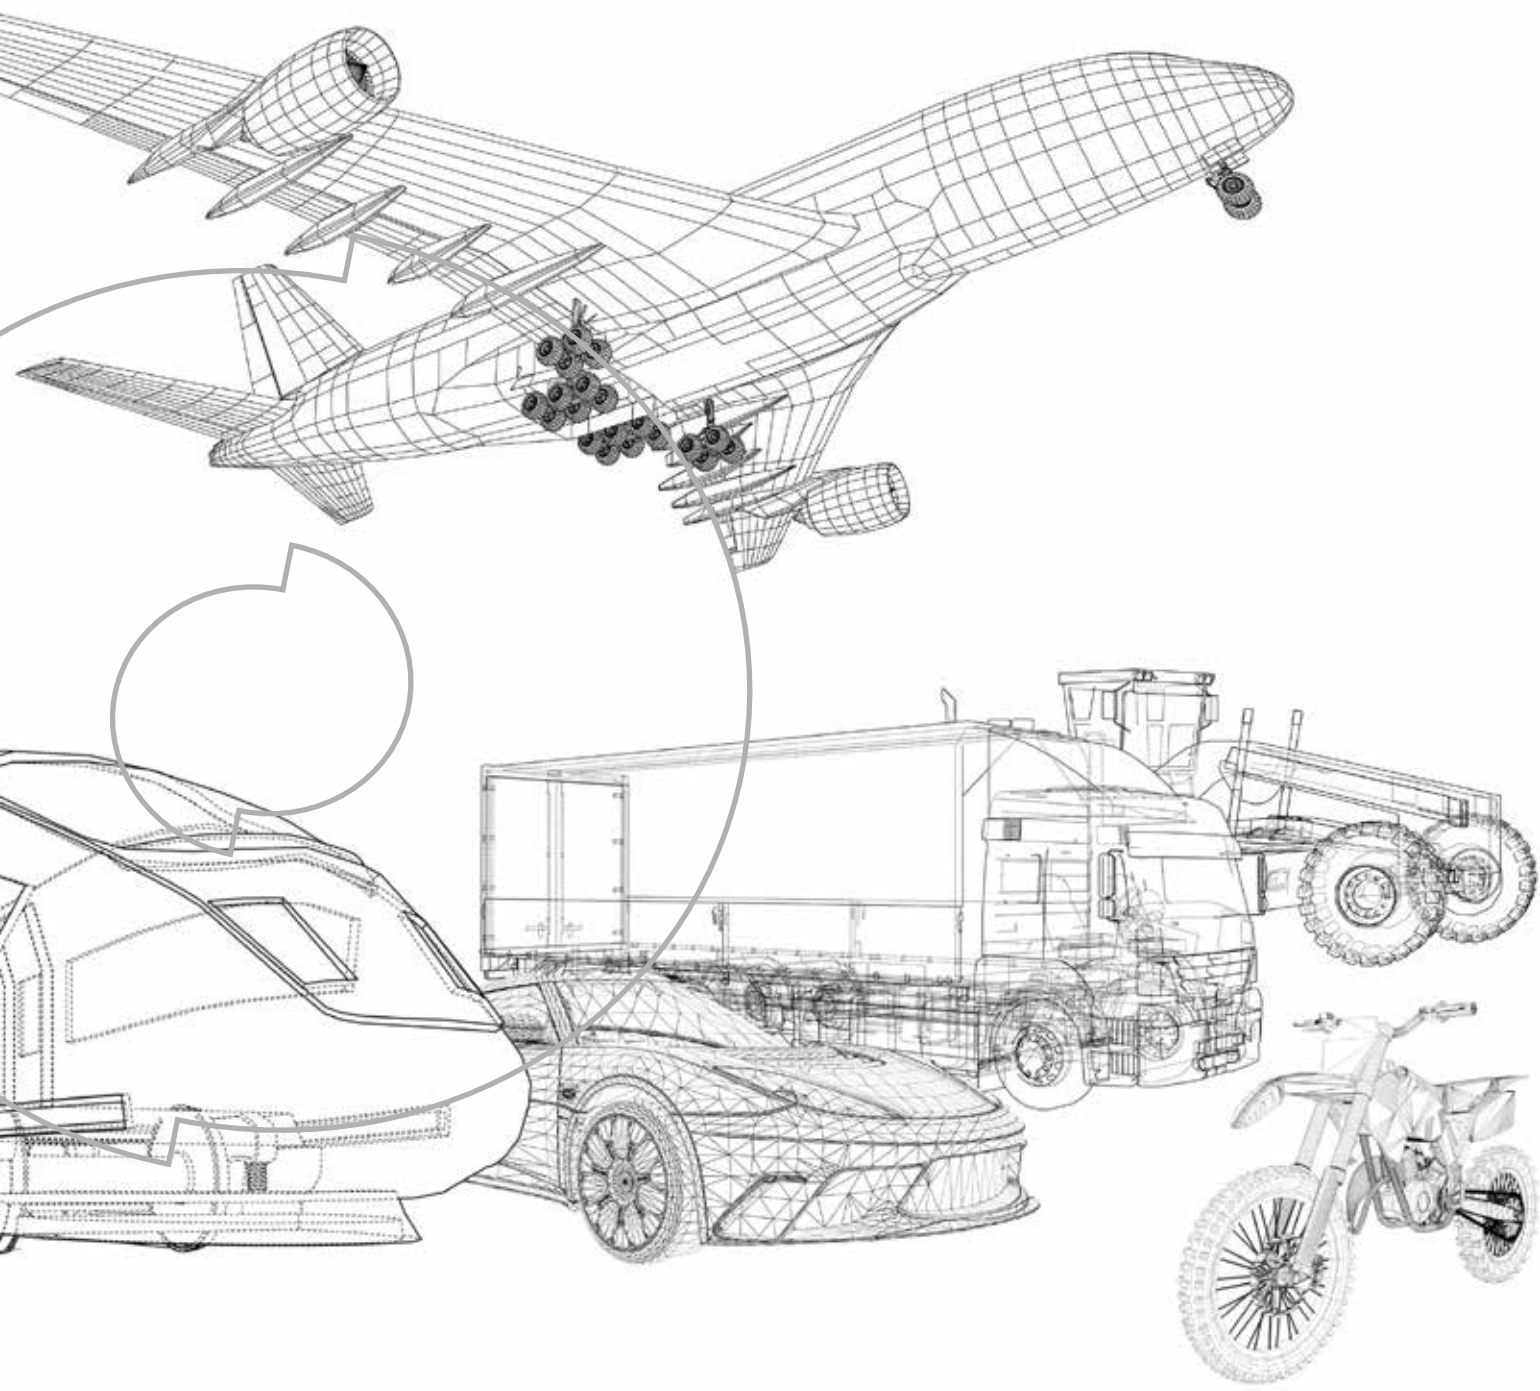

Total Covered Area

+140.000 sqm

EMPLOYEES

1400

Oldrati applies the highest international standards to all its solutions dedicated to Mobility. Innovation and continuous operational improvements are the distinctive factors in Oldrati Group.

E-MOBILITY & HYBRID

INNOVATIVE SOLUTIONS

ADVANCED MATERIALS

Oldrati proposes advanced materials for innovative and unusual solutions such as:

- high temperature
- use with electronics
- use with electromagnetic fields

CLEANLINESS

Specific approach in production and product finalization that guarantees extreme cleanliness.

METAL REPLACEMENT

Solutions for replacing heavy metal components with others in advance polymers. This allows weight reduction and, as a consequence, significant reduction of CO₂ emissions

2k+ TECHNOLOGY

The combination of different materials brings great advantages, such as improved product performance and reduction in production times, which are increasingly important both in the automotive industry and in the medical sector.

High performing regenerated rubber well represents the Group's innovation for a sustainable future.

Technical articles made with regenerated rubber ensure significant CO₂ reduction and reduced environmental impact.

ASSEMBLY

The complete management of the order allows you to take advantage of specific benefits:

- times and costs reduction with automatic lines
 - complete customization
 - production cycle control
- Reduced energy consumption during welding, leading to higher efficiency with ultrasonic welding process

LIGHT VEHICLES

HIGH PRECISION

Strong competence for small parts and for components with high precision, up to 0,03 of a millimeter

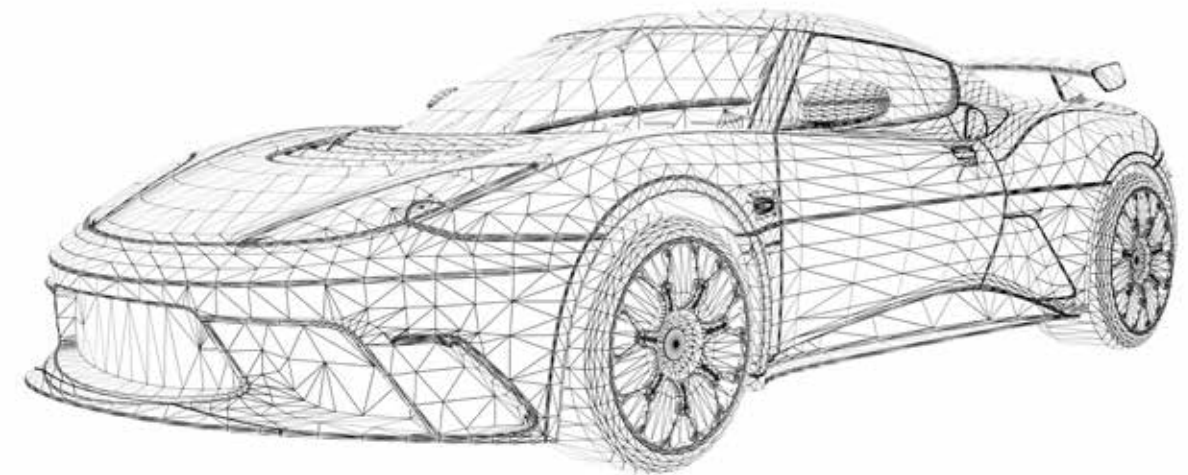

CODESIGN

Oldrati works together with its customers to codesign the optimal solutions for the products

ZERO DEFECT APPROACH

Oldrati implements a zero defect approach in all the production and especially for the products in the Mobility sector

HEAVY & EARTH MOVING VEHICLES

WEIGHT & CO₂ REDUCTION

Solutions that allow significant weight reduction and reduction of pollutant emission

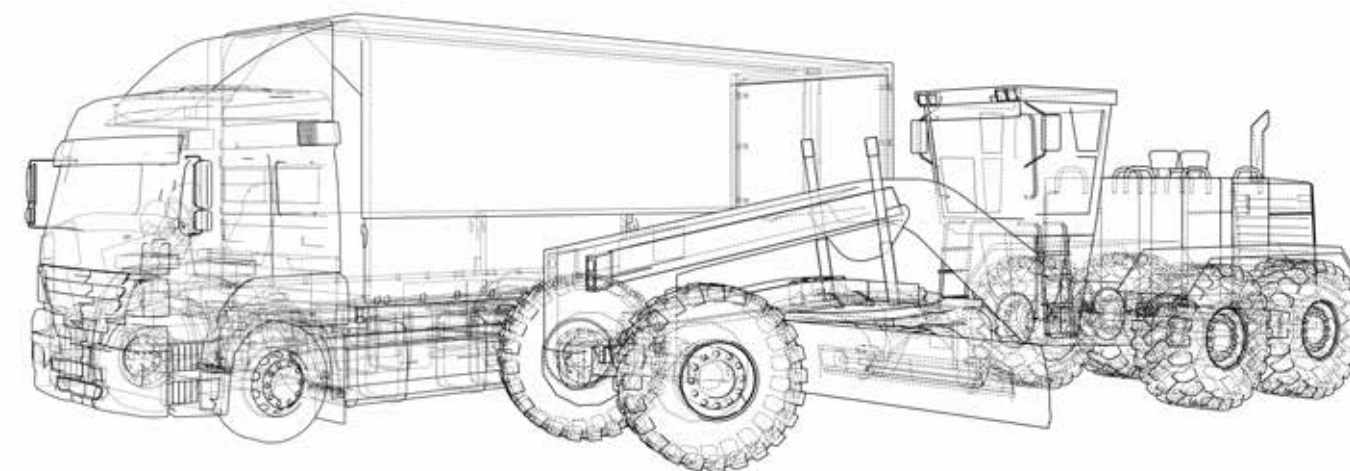

NOISE REDUCTION

Solution to mitigate noise emission both inside and outside the vehicle

MULTIPLE MATERIALS

In-house management of Rubber, Plastics, Thermoplastics and Silicone as well as 2k/3k technology components and metal over-moulding

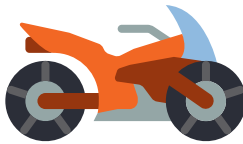

TWO WHEELS

INNOVATION

Strong orientation to new and innovative solutions that can be applied also in standard industrial products

RACING APPLICATIONS

Solutions for racing motorbikes

MOUSSE

Special solution for tires that can find extensive application in the motor-cross segment as well as in bike sharing solutions

AEROSPACE

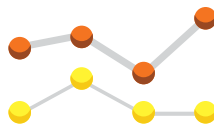

QUALITY

Strict enforcement of quality standards and procedures

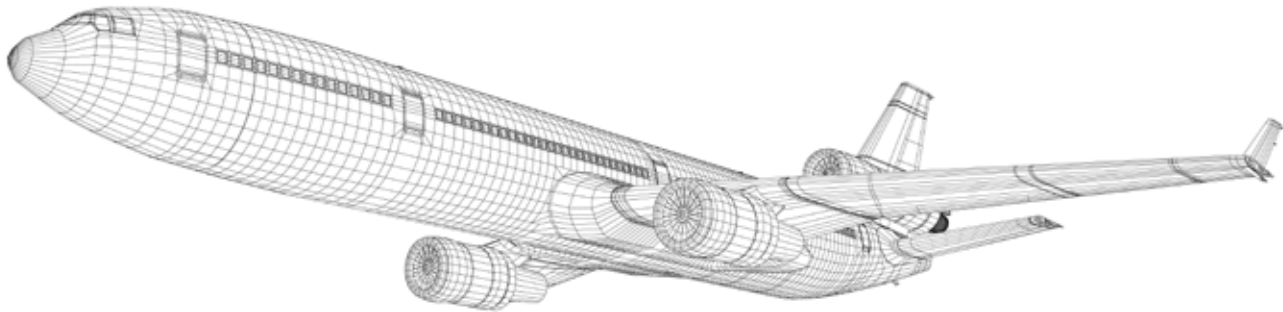

RELIABILITY

Quality ensurance and processes are applied in the complete process

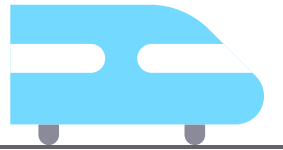

MATERIALS WITH SPECIFIC PERFORMANCE

Ability to use specific materials according to the required application

TRAINS

COMFORT & DAMPENING

Solutions to increase passenger
comfort

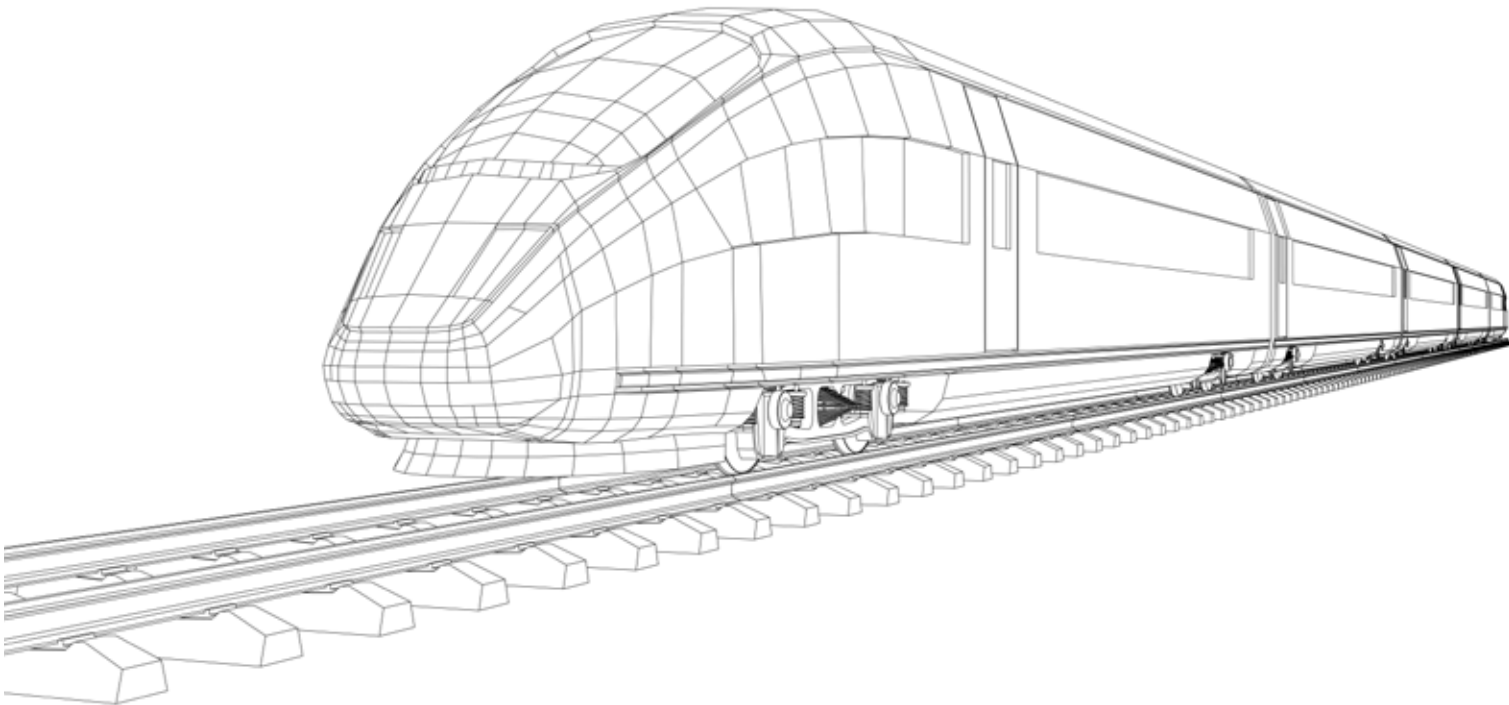

MATERIAL WITH SPECIAL REQUIREMENTS

Use of certified and approved
materials

SAFETY SOLUTIONS

Capability to produce parts used in
safety solutions

OLDRATI QUALITY

CERTIFICATIONS

A Quality Management System is in place with the aim of pursuing and improving, in time, the company's skills to supply products and services fully compliant with the customers' requirements.

Moreover, the goal is to increase customer satisfaction and the efficacy and efficiency of the entire system.

ISO 9001

ISO 14001

IATF 16949

TISAX

ISO 50001

EN ISO 13485

CERTIFIED AND APPROVED MATERIALS

100+

More than 100 certifications for compounds produced in house
